Programa:	DOENÇAS TROPICAIS
Cont. Progr.:	The following subjects will be explored: 1. English language coaching 2. How to learn a foreign language (classical and new Technologies); learning english abroad (Talk/meeting with an english teacher) 3. Students (master and PhD students) testimony 4. Post doctoral training (UNESP/USP experiences) 5. Foreign scientists (talks and contacts) 6. Seminars related to projects being developed 7. Express presentations to experience Congress participation 8. Debates based on Nature and Science scientific vídeos and TED talks
Ementa:	The structure of this course was planned to propitiate an <i>in doors</i> experience with the english language to our students from the Tropical Diseases post graduation program. A number of different activities were programed as talks, seminars and express presentations, and also discussions based on scientific vídeos from very important journals. With these activities we expect to stimulate the students to express themselves in english and, therefore, to contribute to the already initiated <i>Internalization Process</i> of this program.
Bibliografia:	Scientific articles that will be choose according to the students areas of interest Vídeos from Nature and Science journals

PLANO DE ENSINO DE DISCIPLINA

Departamento: DEPARTAMENTO DE DOENÇAS TROPICAIS E DIAGNÓSTICO POR IMAGEM

Disciplina: Scientific Meeting

Objetivo: This program was designed considering two main aspects: to give the students an opportunity to express themselves in english to be prepared to participate in an international Congress or laboratory visit abroad and to contribute to the internationalization strategy of this post graduation program.

Critério Aval.: The following criteria will be used to evaluate student's learning: presence in the activities and participation during the classes.

Parecer: Aprovado em reunião do Conselho do Programa realizada em 10/04/2015
